COOKIE DIES

for
**Triumph
Cookie Dropper**

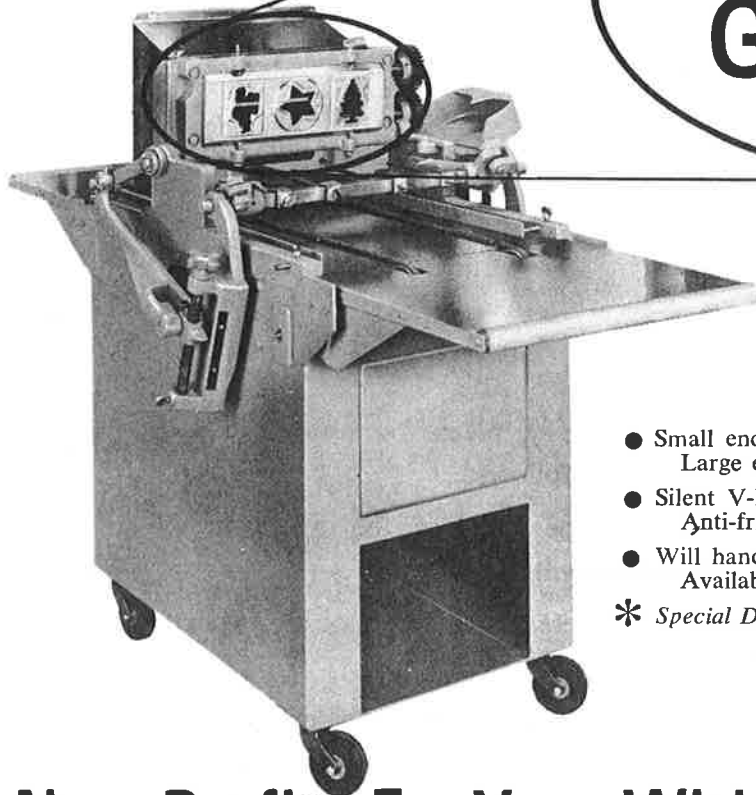

MAGNA MIXER COMPANY
P.O. BOX 40810
CINCINNATI, OHIO 45240
513-851-6907

**Your Die
Goes Here**

- Small enough to fit any shop
Large enough for any production
- Silent V-Belt drive for long, trouble-free service
Anti-friction bearings at all critical points
- Will handle standard cookie sheets or bun pans
Available for 17" or 24" pan widths
- * *Special Designs For Your Products*

New Profits For You—With A Triumph Improved "Handy" Cookie Dropper

- **FASTER PRODUCTION** — Produces up to 1250 dozen, wire-cut uniform cookies per hour, depending upon die.
- **MORE VERSATILE** — Over 400 die shapes to make your cookies "seasonal" — and "different".
- **VARIABLE SPEED CONTROL** — 30 to 70 strokes per minute. Separate pan speed control — spaces cookies as desired.
- **CONTINUOUS OPERATION** — with Special "Tubelt" Conveyor. Micromatic clutch standard. Accurate, adjustable dough feed for cookie thickness.
- **MORE SANITARY** — Stainless Steel Dough Hopper, instantly removable for cleaning by loosening just 2 hand screws.
- **SAVES SPACE** — Exclusive Stainless Steel Hinged Fold-down Table Top — saves 1/3 floor space . . . 4" Rubber Tired Casters for easy movement, and floor protection.
- **MORE ECONOMICAL** — Both in initial cost — and maintenance.

Ordering Instructions

When ordering dies, to save time and money, please be sure to give us complete and accurate information, as follows:

1. **Serial Number of Machine** — This will be found on the oval Triumph name plate. It is a 5-digit number with a suffix "A".
2. **Size of Machine** — Width of machine determines length of die. Specify 17" or 24" machine.
3. **Die Number** — Each die or die group has a separate identity — by letter and number. *Both* are important. Specify also, number of openings. If "Jumble" Center is desired, please specify and include size required.
4. **Where to Ship** — Give complete company name, street address, city, state, zip *and* name of person to whom it should be directed.
5. **How to Ship** — Don't say: "Ship Best Way". Be specific — specify Parcel Post, Air Freight, Railway Express, First Class Mail, etc. 17" dies weigh approximately 4 lbs. each.

By following the above we will be able to expedite your order in the fastest possible time.

See page 68 for Alphabetical Index to Dies

Triumph's "Over 400" Die Assortment For The Triumph Improved "Handy" Cookie Dropper

THERE ARE "OVER 400" SIZES AND SHAPES OF *STANDARD* TRIUMPH COOKIE DIES TO CHOOSE. DIES FOR EVERY SEASON . . . EVERY HOLIDAY . . . EVERY OCCASION.

This book illustrates the full line — in full size — of all Triumph Dies. There are geometric patterns, animal shapes, hearts for Valentine's Day, hatchets for Washington's Birthday, Christmas trees, bells, stars, and Santas. Round hole dies (up to 3½" diameter) are included.

One round hole die is shipped with each machine and is included in the base price of the machine. You specify the diameter and number of openings. See pages 36 through 39.

If you don't find die shapes which satisfy *your* requirements, special dies can be supplied. Furnish sketch.

"Jumbles" are solid inserts mounted in the die openings. They are used to form holes in the finished cookies. "Jumbles" may take *any shape or form* to meet specific requirements and to develop desired resulting patterns. Let us help you with the details.

Take time to browse through this book. You'll find the time well spent. And remember . . .

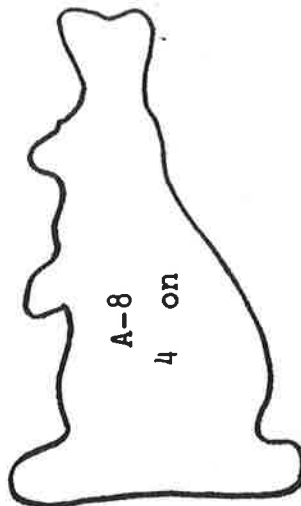

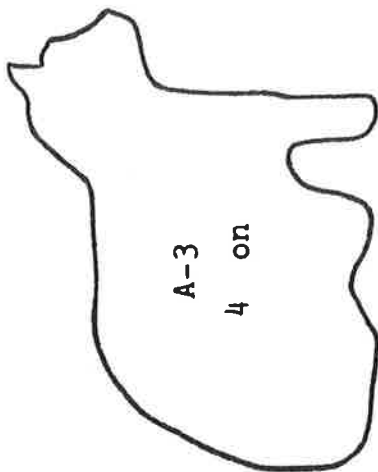

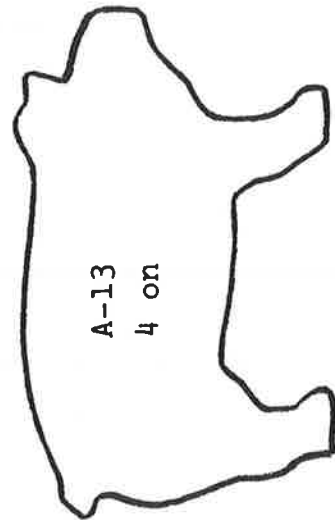

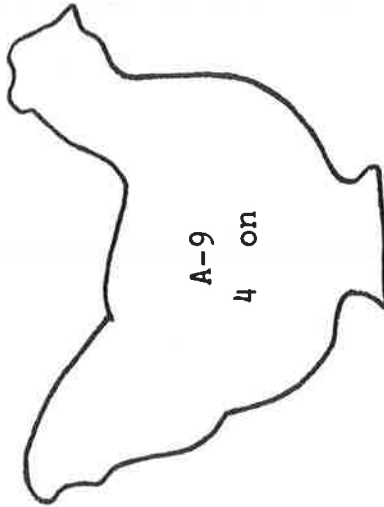

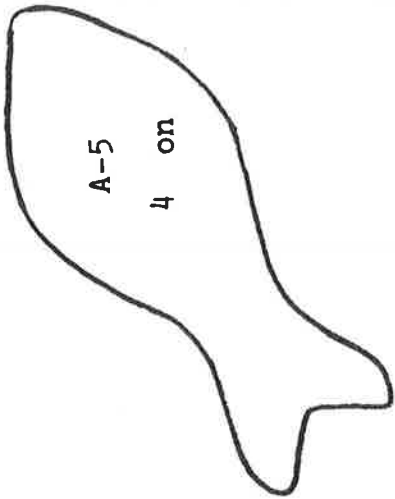

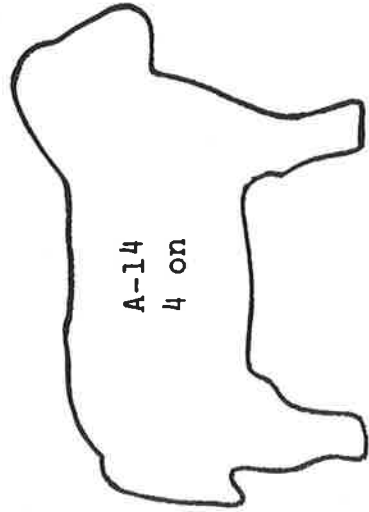

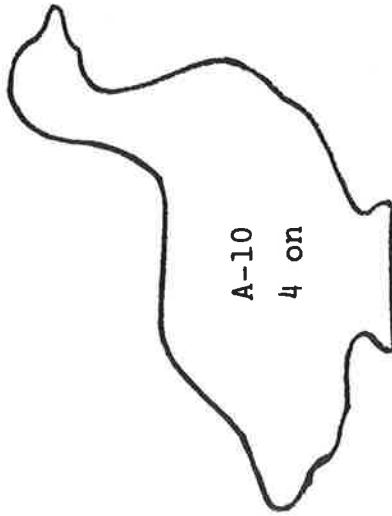

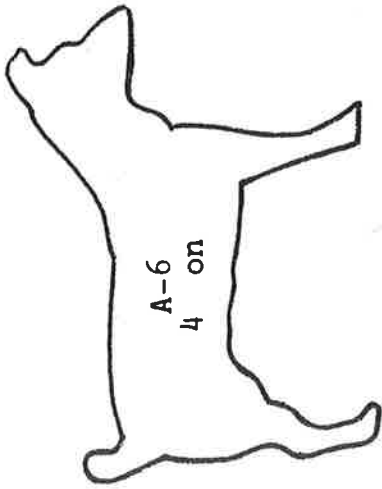

Triumph — with its "Over 400" Die Assortment Offers You More Variety Than Any Other Manufacturer and Increased Opportunities for Selling Timely, Seasonal Shaped Cookies.

Design Highlights of Triumph's Die Assortment

- Shapes and sizes for every holiday . . . every season . . . every occasion.
- Dies are new, non-corrosive aluminum alloy . . . easier handling . . . easier cleaning.
- Die shapes are shown actual size but baked cookie size will depend upon "spread" resulting from *your* formula.
- Die openings are shown as positioned on the die.
- Regular dies have all openings alike.
- Group dies (G numbers) have assorted shapes, i.e., the popular "Bridge Mix" includes a Diamond, Heart, Spade and Club. Various combinations are available for Christmas, Easter, etc. Some popular group dies are listed as "standard groups" on pages 27 through 29. Other combinations can be made to fit your requirements, but, for best baking results, group die openings should be approximately equal in area.
- Special dies can also be furnished to suit your individual requirements.
- Eclair and Cream Puff Shell dies are standard, resulting in uniform product, saving shop time, and decreasing costs.
- Number of holes in each die is listed for 17" machine. 24" machine has proportionately increased number of die openings.

TWIN ROW WAFER DIE

The Twin Row die as illustrated has been designed for increased production of wafers.

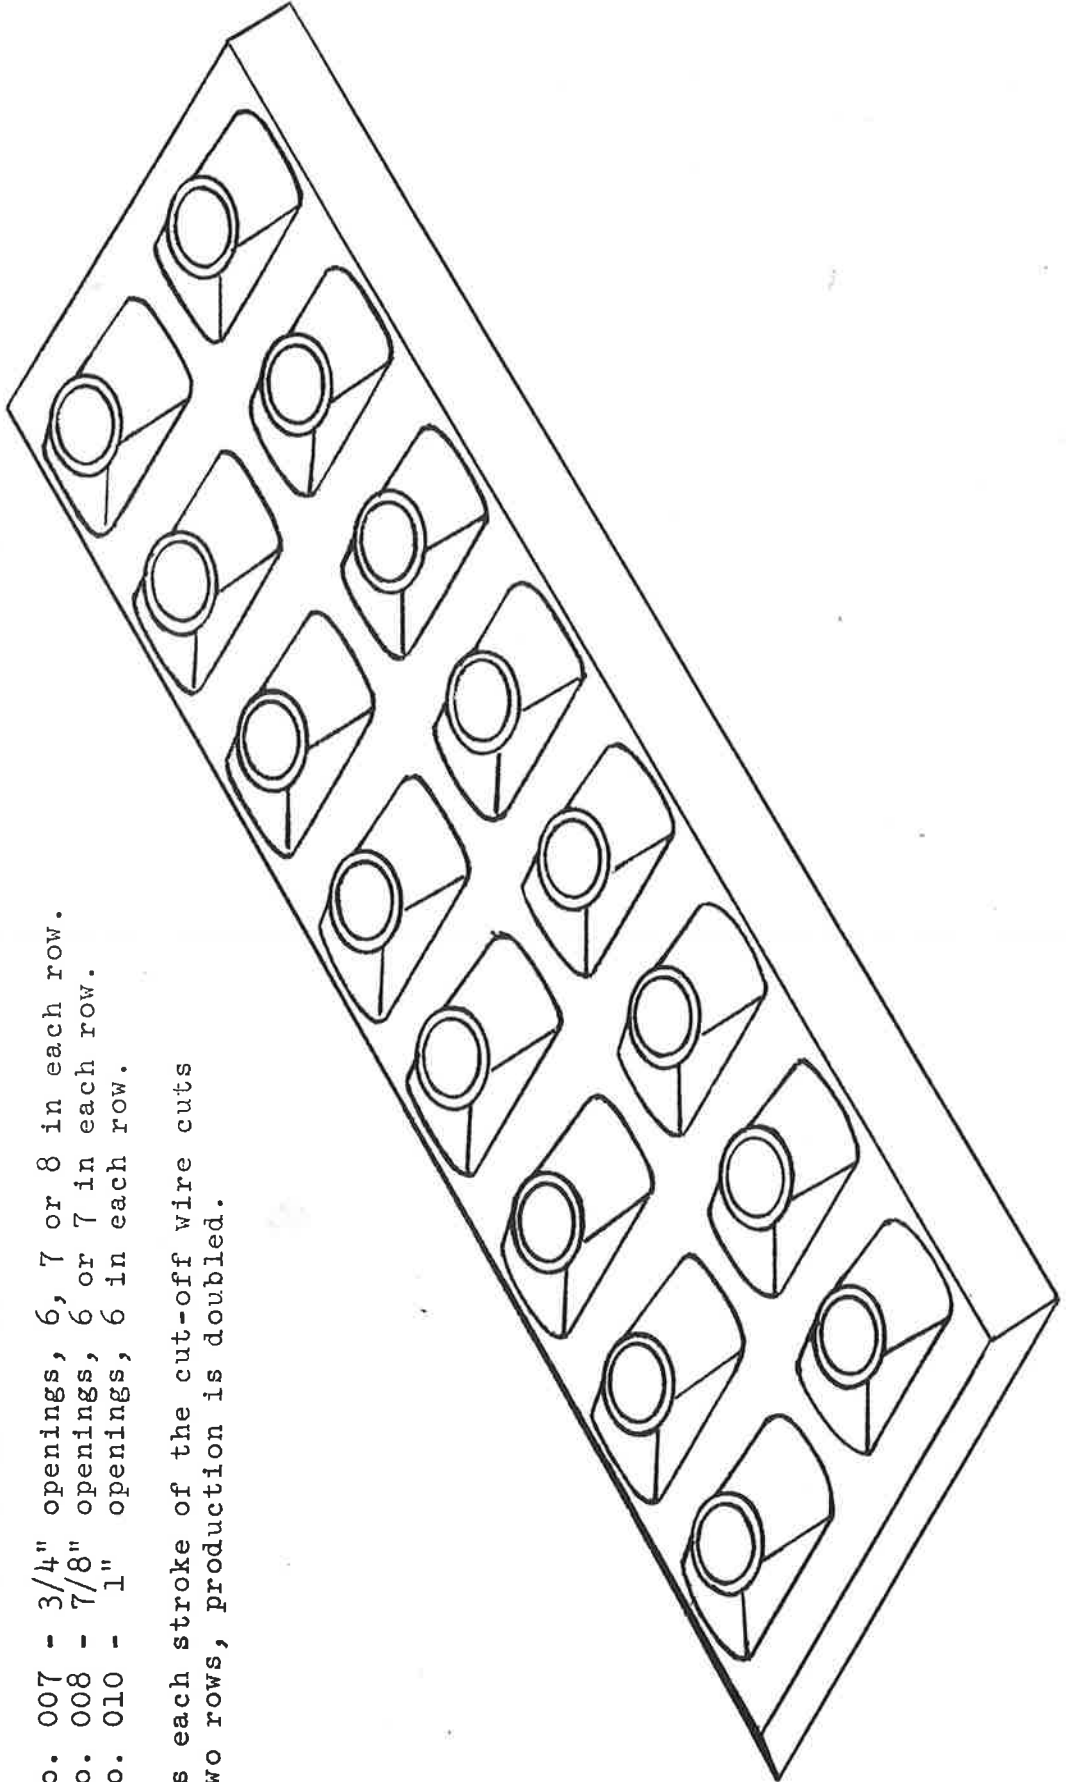

Die available in three sizes:

No. 007 - 3/4" openings, 6, 7 or 8 in each row.

No. 008 - 7/8" openings, 6 or 7 in each row.

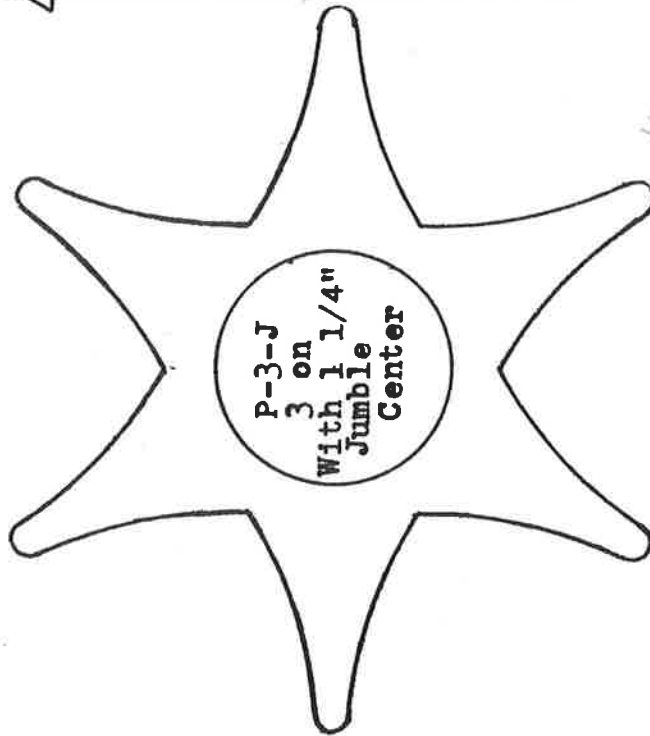

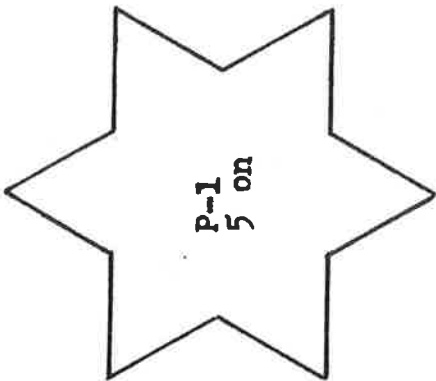

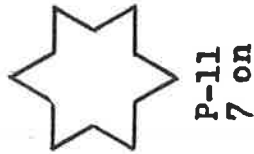

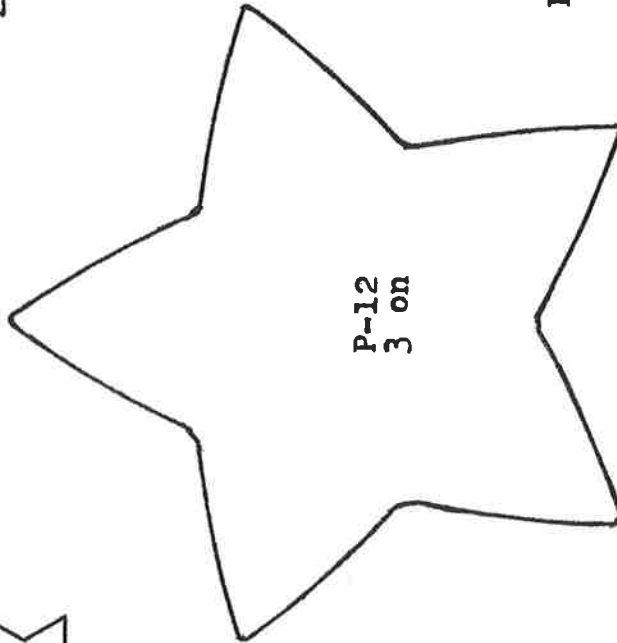

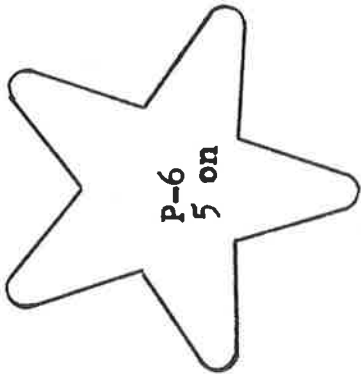

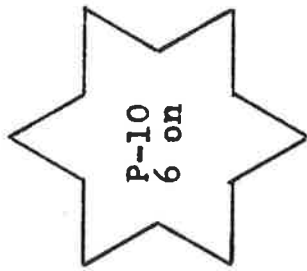

No. 010 - 1" openings, 6 in each row.

As each stroke of the cut-off wire cuts two rows, production is doubled.

T-3

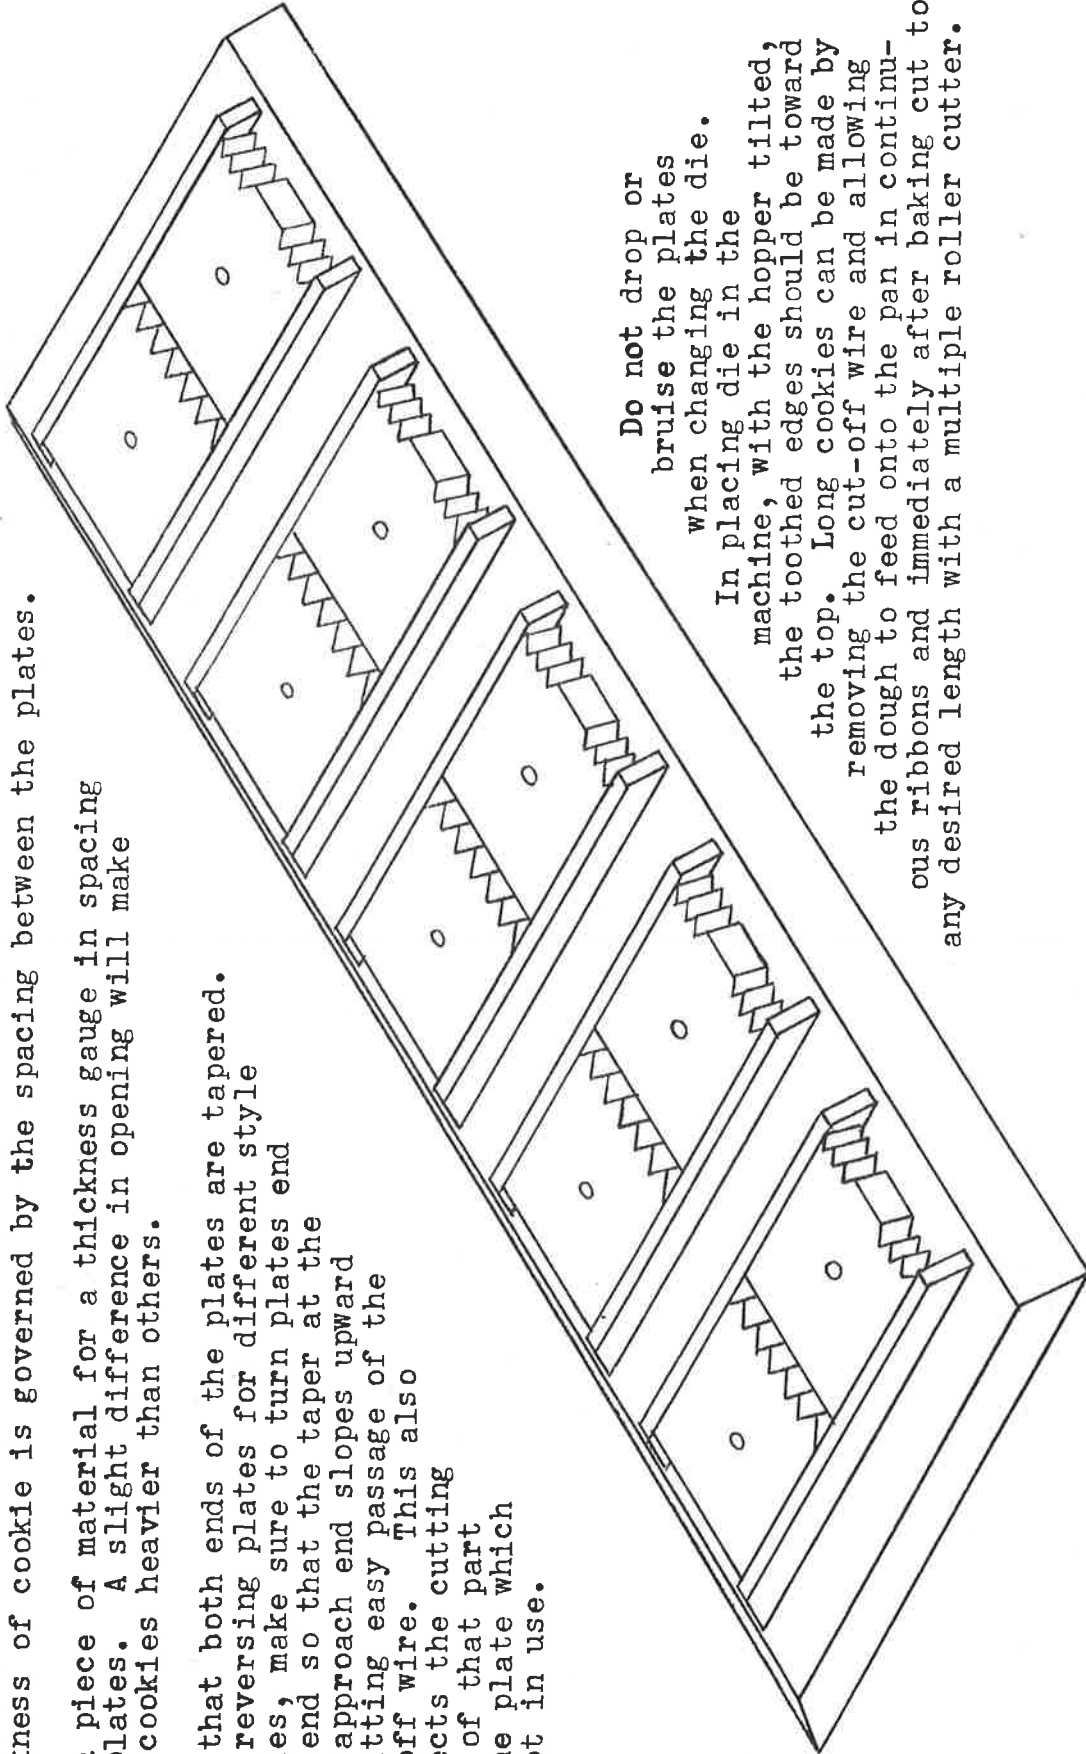

ADJUSTABLE BAR DIE

Thickness of cookie is governed by the spacing between the plates.

Use a piece of material for a thickness gauge in spacing the plates. A slight difference in opening will make some cookies heavier than others.

Note that both ends of the plates are tapered. When reversing plates for different style cookies, make sure to turn plates end over end so that the taper at the wire approach end slopes upward permitting easy passage of the cut-off wire. This also protects the cutting edge of that part of the plate which is not in use.

Do not drop or bruise the plates when changing the die.

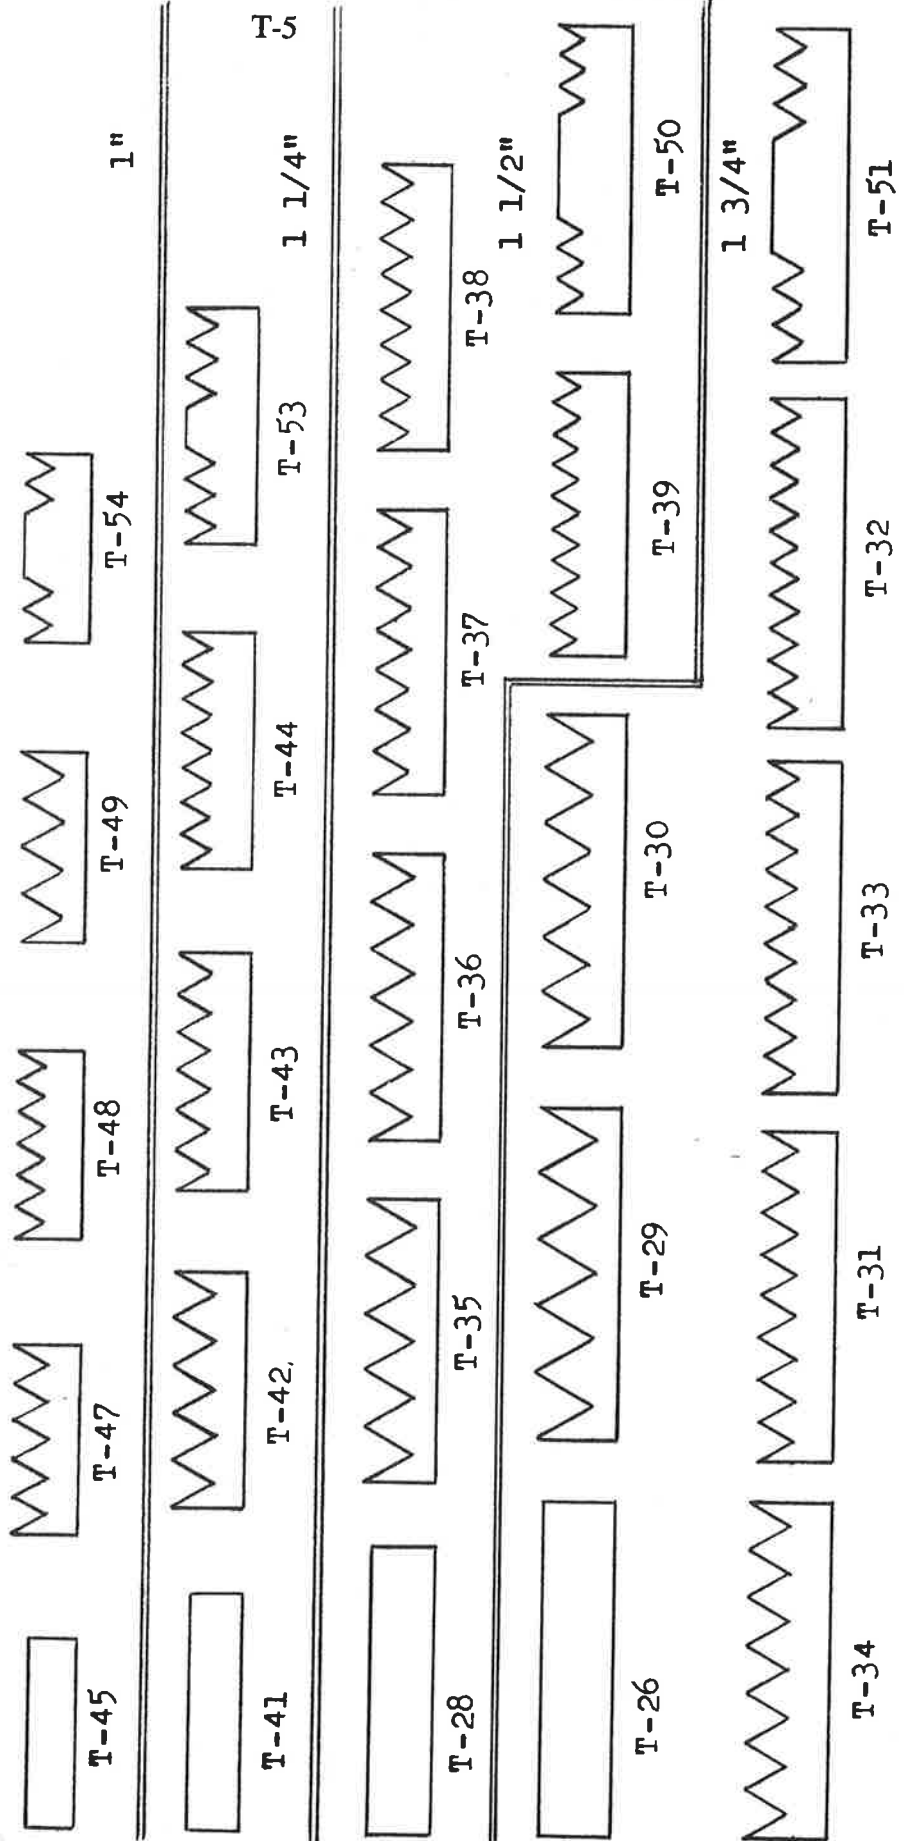

In placing die in the machine, with the hopper tilted, the toothed edges should be toward the top. Long cookies can be made by removing the cut-off wire and allowing the dough to feed onto the pan in continuous ribbons and immediately after baking cut to any desired length with a multiple roller cutter.

DIES FOR TRIUMPH (WIRE-CUT) COOKIE DROPPERS

Adjustable Bar Die Plates

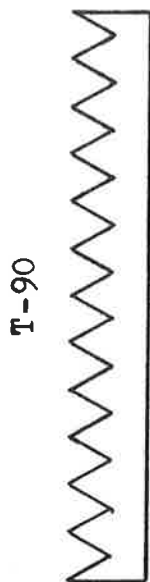

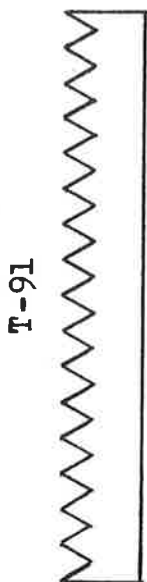

Outlines show exact width of openings with teeth or designs as shown. These dies are made in widths as shown, 1", 1 1/4", 1 1/2", & 1 3/4". The teeth or designs are cut in brass plates and are quickly adjustable to thickness of cookie desired. Plates are furnished with teeth or designs at one end, and with one end plain so that by reversing the plates, cookies with a different style of top or a plain top may be made.

Standard designs are:
 1" - 6 on T-48 and T-45
 1 1/4" - 6 on T-42 and T-41
 1 1/2" - 5 on T-36 and T-28
 1 3/4" - 5 on T-30 and T-26
